

Testimonials

"Thank you for your continued support of the RiteCare Clinic. The speech therapy and literacy development your clinic has provided to my son has given him an opportunity to succeed in school and in life."

"The RiteCare Clinic has been a blessing to our family. Without the clinic's assistance, our children's speech problems would have required expensive treatment. Our children have enjoyed coming to the clinic and have made continual progress. The clinic is a benefit to our community and provides an important service to many children."

"We would like to thank all of you for the wonderful opportunities that your clinic has given to our family. Our son has experienced a positive childhood. His communication abilities are awesome and he is so proud that he is able to play with other children and able to communicate his needs. Thank you for offering this fabulous program to our family. We will be ever indebted to your efforts to make this program continue."

"I don't know where our daughter would be without the help of the Scottish Rite. Her imaginary play skills, computer skills, reading skills, as well as listening and attending skills have all greatly improved as a result of her sessions at the clinic. We are grateful for the generosity and vision of the Scottish Rite Foundation. Our daughter will be forever blessed because of our experience with the RiteCare Clinic."

"The RiteCare Clinic has had an incredible impact on our family's life. When our son first started coming to the clinic, you could not understand anything he was trying to say. It was hard for him to communicate what was wrong with him or his excitement. Now he is communicating everything he needs to say. He doesn't get frustrated anymore like he used to do so often. The Scottish Rite Foundation is the greatest thing that has come into our family and son's life. It has turned frustration into laughter. Thank you for everything you do for us!"
